LARGEST METALLIC SCRATCH RESISTANT SURFACE

Is the only board needed in the classroom, allows the use of magnets for diverse purposes

COMPATIBILITY

with present day computing devices

Key Features

- Latest technology permits efficient interconnection between digital video and audio systems, minimizing maintenance.
- With 100 Diagonal Inches the 7100 series is the largest board and can replace the regular white board.
- Dual-touch features enable recognition of different touch inputs on the screen, while the touch gestures function differentiates touch actions taken on the screen, such as: zoom, erase, rotate, flick, and others.
- Integrated dual-touch system provides personalized solutions such as:
 - Using the dual-touch features in many programs without special pens, mouse or keyboard.
 - Customizing touch actions on the screen to personalize them in a unique way.
- Open system compatibility, easily connects to an external computer running Microsoft Windows, Mac OS, or Linux operating systems.
